

Guangzhou Veeluame Technology Co.,Ltd.

Dare to innovate, empower the future

Company Profile

Leading Manufacturer

Headquartered in Guangzhou, specializing in LCD high-definition screen splicing video wall display systems.

Integrated Solutions

Covering KTVs, command centers, commercial signage, and security monitoring with multi-signal synchronization.

Reliable Performance

Ultra-narrow-edge splicing, 24/7 stable operation, and comprehensive after-sales service system.

Entertainment-oriented advertising video/graphic playback system - System Composition

Splice Controller

Responsible for processing and distributing video signals, ensuring synchronized output of all displays

Light Control Unit

Central control system, which uniformly schedules the effects and synchronization of all lighting equipment.

Audio Device

Provides high-quality audio input and processing, supporting the connection of various microphones.

Spliced Display

High-definition large screen splicing, delivering delicate video images and strong visual impact

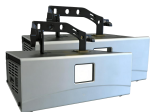

Bee Eye Laser Lamp

Provides high-brightness, colorful laser beam effects to create a stage atmosphere

Dynamic Light Strip

Atmospheric background lighting, supports multiple color changes, enhancing spatial dynamics.

Animation Laser Light

Projects complex dynamic laser patterns and achieves high-precision beam control

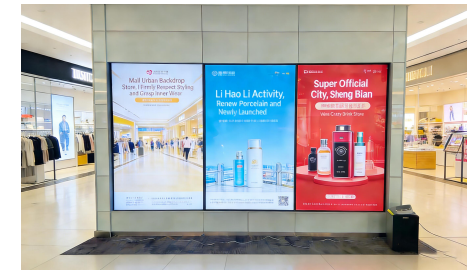

Chromed Pattern Light

Provides a variety of static and dynamic pattern effects, enriching the visual hierarchy

Entertainment-oriented advertising video/graphic playback system - Product Details

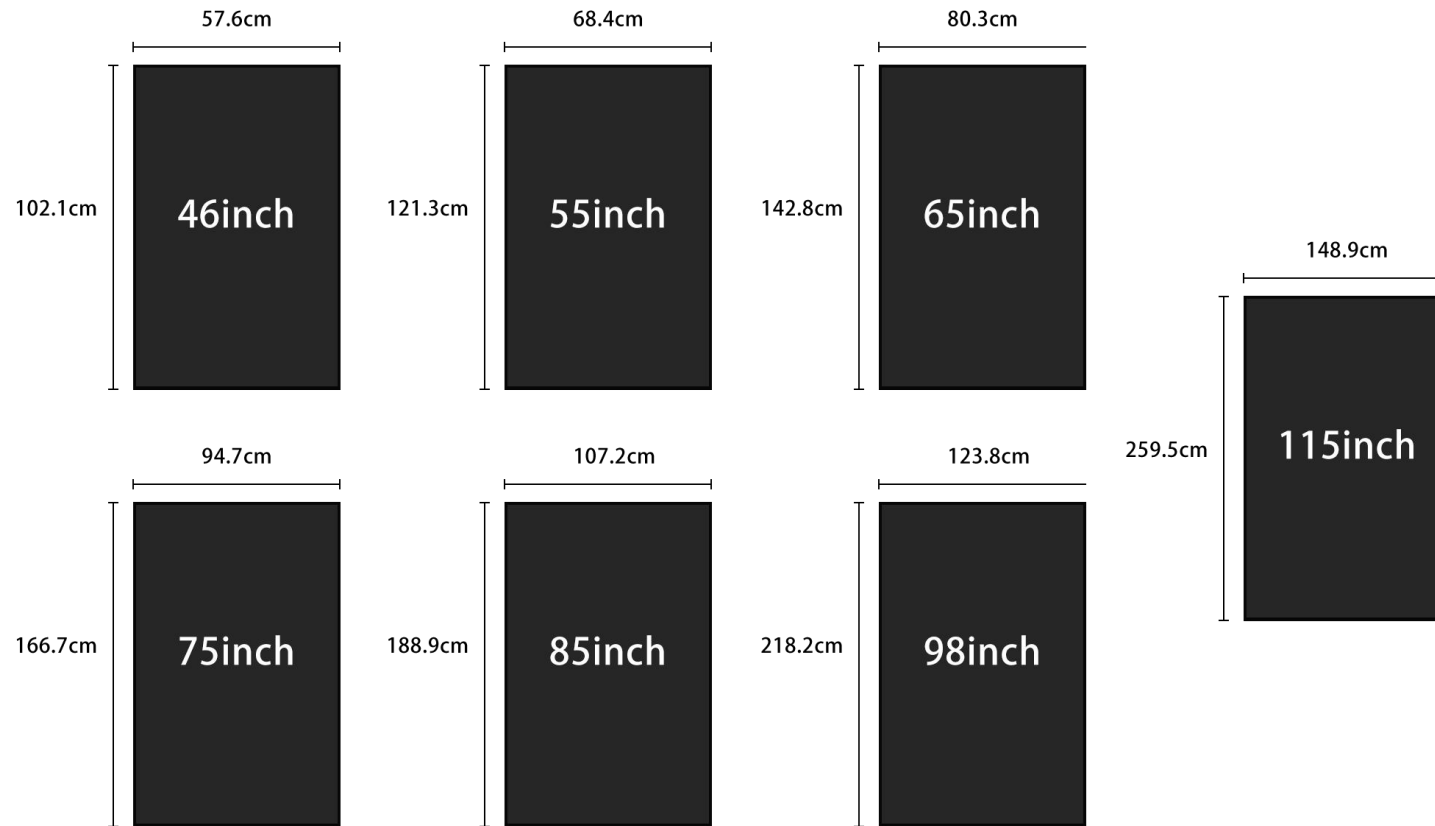

Flexible Display Functions

Our advertising display system is built on hardware as the foundation and software as the driver, delivering an integrated solution with terminal display and cloud management. Breaking the limits of traditional advertising, it serves commercial, transportation, cultural tourism and government sectors. Featuring high-definition visuals, intelligent control and high reliability, it is the core carrier for digital communication across industries

Entertainment-oriented advertising video/graphic playback system - Product Details

Explosion-Proof & Narrow Bezel

We provide a wide range of display screens, covering all sizes including 46, 55, 65, 75, 85, 98 and 115 inches, which can meet the installation and application requirements of different scenarios.

Entertainment-oriented advertising video/graphic playback system - Product Details

Powerful Splicing Controller

6 HDMI out, 2 HDMI in, 2 USB, 2 LAN. Supports dual control (mobile & PC) with 108GB built-in storage.

Entertainment-oriented advertising video/graphic playback system - Application Scenarios & Technical Parameters

Application Scenarios

-  KTV Entertainment & Digital Signage
-  Command Center & Security Monitoring
-  Government & Corporate Conference Rooms
-  Indoor Advertising Screens

Entertainment-oriented advertising video/graphic playback system- Application Scenarios & Technical Parameters

Cloud Platform System

The cloud platform website <https://cloud.veelume.com> enables one-click remote control of devices. It can simultaneously control multiple devices across the country, facilitating unified management of chain stores.

Smart Split-Screen Multiple Split Modes

Built-in multiple split modes, or customize split areas.
Play images and videos at the same time,
no more single display, easier to use

Entertainment-oriented advertising video/graphic playback system - Application Scenarios & Technical Parameters

Technical Parameters

Screen Parameters	
Apply	indoors
Screen panel type	Add an LCD panel explosion-proof design
Type	4K LCD
Screen size	55 inches, 65 inches, 75 inches, 85 inches, 98 inches
Physical seams	10.4mm
Screen brightness	Center 300cd/m2 (±10)
Color	black
Reaction time	8ms
Screen contrast	4000: 1 (Typ.)
Ip rating	IP54
Installation	Wall Mount
Resolution	3840×2160 (UHD)
The type of screen backlight	DLED
Power input	AC110-240V,50/60HZ
Standby power	≤0.5W
The consumption rate of the whole machine	<350W
Display colors	8bit,16.7M

Screen Type
LCD Panel

Resolution
3840*2160 (UHD)

Brightness
300 cd/m²

Bezel Width
5.2mm (&1.75mm)

Interfaces
HDMI, DVI, VGA, LAN

Contrast Ratio
4000:1

Entertainment-oriented advertising video/graphic playback system— —Entertainment

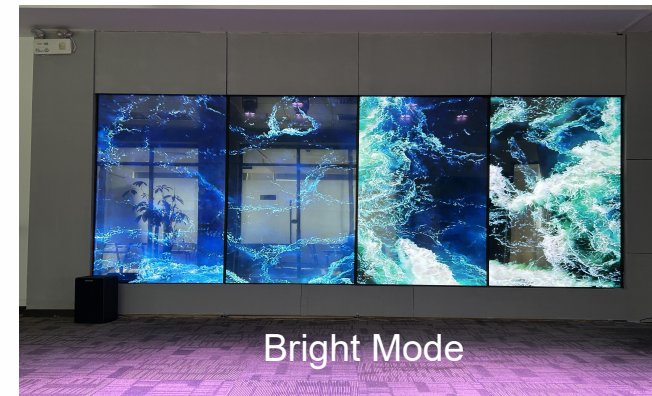

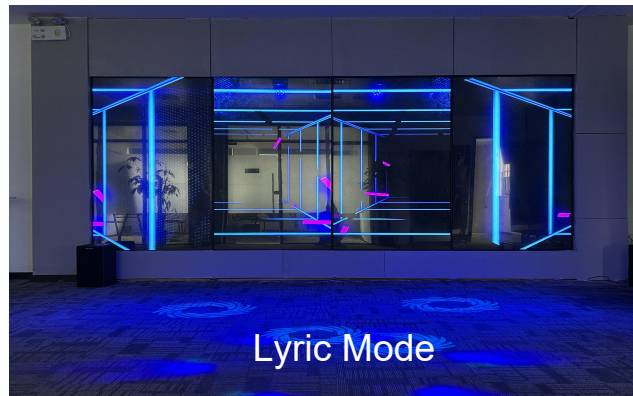

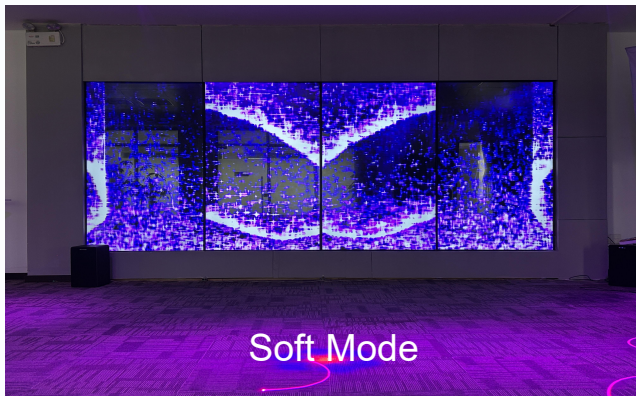

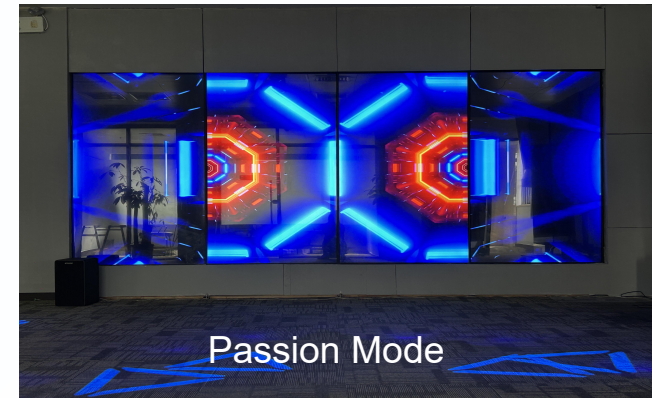

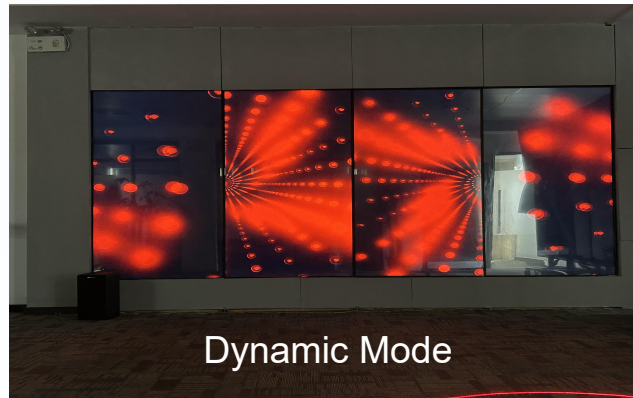

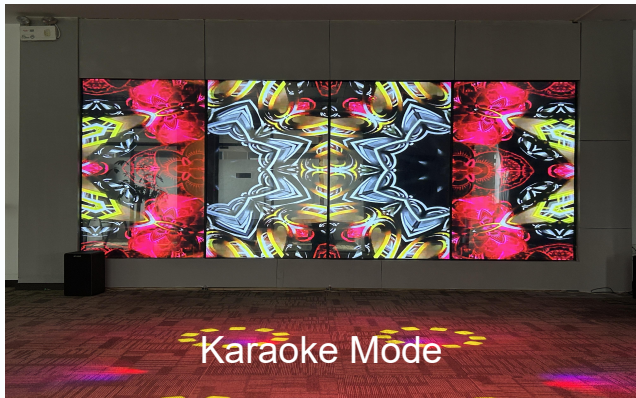

Product Introduction

Equipped with a 4K high-definition LCD video wall, integrating colorful pattern lights and eye-catching laser lights. The system intelligently recognizes audio signals through the controller, achieving millisecond-level synchronization of video, audio and lighting effects, creating an immersive and highly dynamic party atmosphere

Entertainment-oriented advertising video/graphic playback system

Six Lighting Effects

It features six modes: Romantic, Passion, Dynamic, Karaoke, Soft, and Bright. Each scene switches automatically with the music rhythm, and the rhythm accelerates with the music in Dynamic mode
